New FARMPRO Electric Fence Energizer with Extended Features

FP7500XR

Specifications

- 110V Plug-in Energizer
- Powers up to 750 Acres
- Powers up to 125 Miles
- **Ultra** Low Impedance
- 7.5 Joule Output

Extended Features

- **Fence and Ground Check** displays fence condition
- **Remote Control Compatible**
- Shocks through wet and heavy vegetation **for the toughest electric fence conditions**
- Controls **mid-sized to large animals, exotics and wildlife**
- **3-year warranty** including lightning damage; longest warranty in the industry

FP7500XR Fence and Ground Check

This energizer is equipped with special features that allows quick fence condition determination. The two LED lights on the front of the unit indicate the condition of the fence and ground system. When the energizer is connected to a fence and ground system, the unit's LED lights will blink either red or green depending on the condition of the fence and ground system.

What is *Ultra* low impedance?

Ultra low impedance fence chargers deliver an effective shock through the most challenging conditions – heavy weeds, and wet or snow covered ground. FARMPRO Power Wizard's shock technology is number one in the industry for delivering *ultra* low impedance for the full length of your fence.

What is a joule rating?

A **joule** is a measure of electrical energy. FARMPRO Power Wizard energizers are rated in output joules, indicating the energy/power of the fence energizer and the fence wire. The higher the joule rating, the higher the shock pulses and the more powerful the fence energizer.

Convenient Clamshell Packaging
